

# African Elephant Neighbors

Elephants aren't the only animals in the African forest and on the savannah. They have many animal neighbors! And just like elephants, the other animals leave behind footprints.

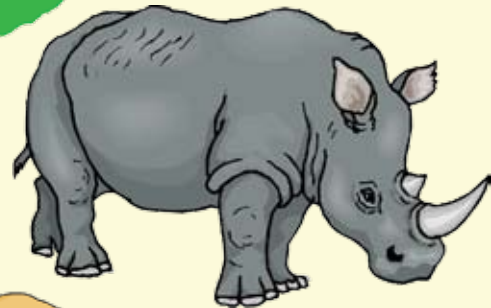

Match the footprints with the animal that left it behind. If you need a hint, there is a clue under each footprint. The first one was done for you!

Giraffe

I belong to an animal with horns on its nose

Rhinoceros

I belong to an animal with a really long neck

Lion

I belong to a big furry animal who lives in the forest

Zebra

I belong to a big cat with a loud "ROAR"

Gorilla

I belong to a really big animal who lives in and near water

Hippopotamus

I belong to an animal with lots of stripes

Learn about the animals that live near your home and see if you can find their footprints in your backyard or at a park!
