

# ASIAN ELEPHANT

*(Elephas maximus)*

NORTH AMERICAN REGIONAL STUDBOOK

1 JANUARY 2003 – 30 APRIL 2005

MIKE KEELE – STUDBOOK KEEPER

KAREN LEWIS – CONSERVATION PROGRAM ASSISTANT

## MESSAGE FROM THE STUDBOOK KEEPER

As a complete studbook, information is included on Asian elephants that we were able to document as existing at one point in time in North America. This edition includes information on 624 elephants, 98 more than the last edition which was published in 2000. 20 of these animals were captive born. The remaining 78 additional elephants were added because we received historical animal records that validated their existence. Of the 624 elephants in the Studbook, 273 (46.227) are living and 139 (23.116) are currently housed in AZA facilities.

We have added two additional sections to this edition of the Studbook. A “Lost To Follow Up” section lists 6 male and 40 female elephants whose current location is unknown to us. The “Undocumented” section lists 37 male and 248 female elephants that we believe are individuals who existed in North America at one time, however, we lack any official supporting documentation to give them official studbook numbers. There is a chance that some of these elephants already have studbook numbers under different house names, it is also likely that some of the undocumented elephants are duplicates of one another. It is important that we have appropriate supporting documentation to avoid assigning more than one studbook number to the same elephant. In our continuing efforts to validate all of the undocumented elephants, we would like to solicit your help by requesting that you review both of these new sections and provide us with any information that might help us locate the elephants that have been lost to follow up, validate the undocumented elephants, or lead us to someone who might be able to.

A majority of the work associated with publishing this Studbook was performed by Karen Lewis. Karen serves the Oregon Zoo as our Conservation Program Assistant. She surveyed facilities and compiled the information used in this publication. She has done most of the data validation in addition to making contacts with many of you who have contributed animal information to the Studbook. Our future efforts will be to continue to validate historical information and we will be contacting many of you to assist us with that effort.

Karen has also recorded individual reproductive information into each animal’s studbook file as well as passed the information on to Janine Brown, Reproductive Advisor to the Elephant TAG/SSP. Dr. Brown has done considerable work with female reproductive cyclicity and anomalies. She extends her gratitude to all of you who provide the requested information. We plan to continue to compile this information in an ongoing effort to establish the complete reproductive life-cycle of elephants.

Special thanks for all of you who have been responsive to our requests for information and for responding to our surveys. We could not have accomplished this publication without your efforts.

Additional information or corrections are enthusiastically welcomed and should be forwarded to either myself or Karen.

Mike Keele – Deputy Director

## GENERAL INFORMATION ABOUT THE ASIAN ELEPHANT STUDBOOK

- Geographic Scope of Studbook
- Time Scale
- Description of Data Fields

## General Information About the Asian Elephant Studbook Update

**A. Geographic Scope of Studbook Update** - This report contains information on 624 Asian elephants belonging to, or once belonging to:

1. American Zoo and Aquarium Association (AZA) participating institutions - These are institutions that have met the accreditation standards of AZA and, through AZA's Full Member Participation Process, participate in the Elephant TAG/SSP.
2. Non-AZA Member Participating Institutions - These are institutions that are not, or have chosen not to be, accredited by the AZA. However, through an application process, they have been approved to participate in the Elephant TAG/SSP.
3. Non-AZA institutions and Private holders - These are institutions and individuals who are not, or have chosen not to be, accredited by AZA. Additionally, they have not been given and/or have not applied for non-AZA member participation status, however they have agreed to share their collection information with the Elephant TAG/SSP.

AZA participating institutions and Non-AZA participating institutions hold all of the Asian elephants managed by the Elephant TAG/SSP. No TAG/SSP recommendations are made for animals held by Non-AZA institutions or Private holders. All of the holders of Asian elephants listed in this studbook are located in the United States or Canada.

**B. Time Scale** - the data set presented in this Studbook is current through 30 April 2005.

### C. Description of Data Fields -

- **Stud #** - a number assigned to each animal in the studbook. The numbers have not been assigned chronologically by age.
- **Sex** - "M" = male, "m" = neutered male, "F" = female, "?" - unknown or unverified.
- **Birth Date** - Many wild caught animals have estimated birth dates and these are indicated using a "~" symbol in front of the date. "?????" represent that a verifiable estimated birth date was not available and has not been established.
- **Sire/Dam** - "WILD" indicates that the Studbook animal was wild caught and its parents were unknown free-ranging individuals. "UNK" indicates that the Studbook animal was captive born, outside of North America, and its parents are unknown captive individuals. "MULT" is used for several animals where the true sire, one of two individuals, has not been firmly established.
- **Location** - This field documents movement of the individual animals from its first location to its current or last known location. "UNKNOWN" indicates that the animal exists or existed but its location has not been confirmed. A complete listing of all location abbreviations may be found under the Institutional Listing section beginning on page 7.

- **Date** - The field documents when the above “Location” events took place. “????” indicates no information was provided.
- **Local ID** - This is an important whorl in the animal's fingerprint and is included in the Studbook when it is provided.
- **Event** - Describes significant changes in the life of the animal including “birth” and “transfer.” Ownership and loans are not recorded in the studbook
- **Name** - House names of the individuals. Many elephants have been given more than one house name as they move from facility to facility. Additional house names are included in the Asian elephant House Name Roster beginning on page 145.
