

## **Saving Elephants by Helping People—Sri Lanka**

The 'Save Elephants by Helping People' project will take place in rural Sri Lanka. Both farmers and elephants in Sri Lanka will benefit from a 9-mile electric fence to be installed from Batalayaya to Nuwaragala. This project will also implement training programs for community leaders from 55 community fence maintenance organizations and develop a pilot project to establish and measure the efficacy of biological fences using *Agave* species.
